1.0 INTRODUCTION

1.1 GENERAL

This document is prepared and maintained by the community with the assistance of the Coast Guard, other government agencies, and the Response Organizations.

1.2 PURPOSE

- Provides basic direction to the community in the event of an oil spill
- Identifies community resources available to the community and to incoming responders
- Provides a consistent approach to contingency planning at the community level
- To assist in the definition of interface, roles, and responsibilities between Federal, Provincial, and Municipal officials
- The components of this plan are contained in the Table of Contents

2.0 NOTIFICATION

2.1 ENVIRONMENTAL EMERGENCY NUMBER

In the event of an oil spill or an environmental emergency, call:

1-800-565-1633 (24 hours).

Your contact will be the Canadian Coast Guard Operation Centre, who will notify the appropriate Government Agencies.

When reporting an incident to the operations centre, callers should give their name (optional), telephone number, and time the spill was sighted.

Here are a few of the important things you should try to note **when you report a spill**:

1. What is spilled, how much, and where is it located?
2. Is the spill on the land, in the water, and is it moving?
3. Do you know the source of the spill?
4. Is the spill an immediate threat to public safety or business?

Note: Gasoline and chemical spills should also be reported directly to the local fire department.

If you do not know all the answers do not wait. Call the **1-800 number** so a response can begin.

2.2 COMMUNITY EMERGENCY NUMBERS

Organization	Phone No.	
Fire	911	(506) 662-3333
Police	911	(506) 662-8484 1-800-665-6663
Emergency Measures Coordinator (EMC)	Michael O'Neill (506) 662-9885 (h)	Sheldon Cook (506) 662- 3551(h)
Hospital	(506) 662-4060	
Ambulance	911	(506) 662-4060
Department of Fisheries and Oceans	(506) 662-3151	
Grand Manan Marine Auxillary	Joey Green (506) 662- 8310(h)	Bev Cary (506) 662- 8237(h)
Local CAPP Contact - Laurie Murison	(506) 662-8316(h), (506) 662- 3804(w)	

3.0 GEOGRAPHIC BOUNDARIES

3.1 NARRATIVE DESCRIPTION OF AREA COVERED BY PLAN

This plan includes the Grand Manan archipelago in Charlotte County, NB which includes permanently populated islands (Grand Manan, White Head, Machias Seal), seasonally populated islands (Long, Ross, Kent, Wood, Cheney, Sheep, Hay, Outer Wood, Gannet Rock) and all other unpopulated islands, ledges and rocky shoals in the archipelago. The latitude and longitude would be approximately: 44 48'N and 44 34"N, 66 55'W and 66 41'W.

This area is entirely surrounded by the Bay of Fundy accessible only by sea or air. The closest communities in New Brunswick would be on Campobello and Deer Islands, and Blacks Harbour. In Maine, it would be Eastport and Lubec. In Nova Scotia, separated by about 50 km, would be Digby, and the communities on Digby Neck, Long and Brier Islands.

3.2 TOPOGRAPHIC MAPS (1:50,000)

To be provided by the Community

- Covering the coastal area of the plan

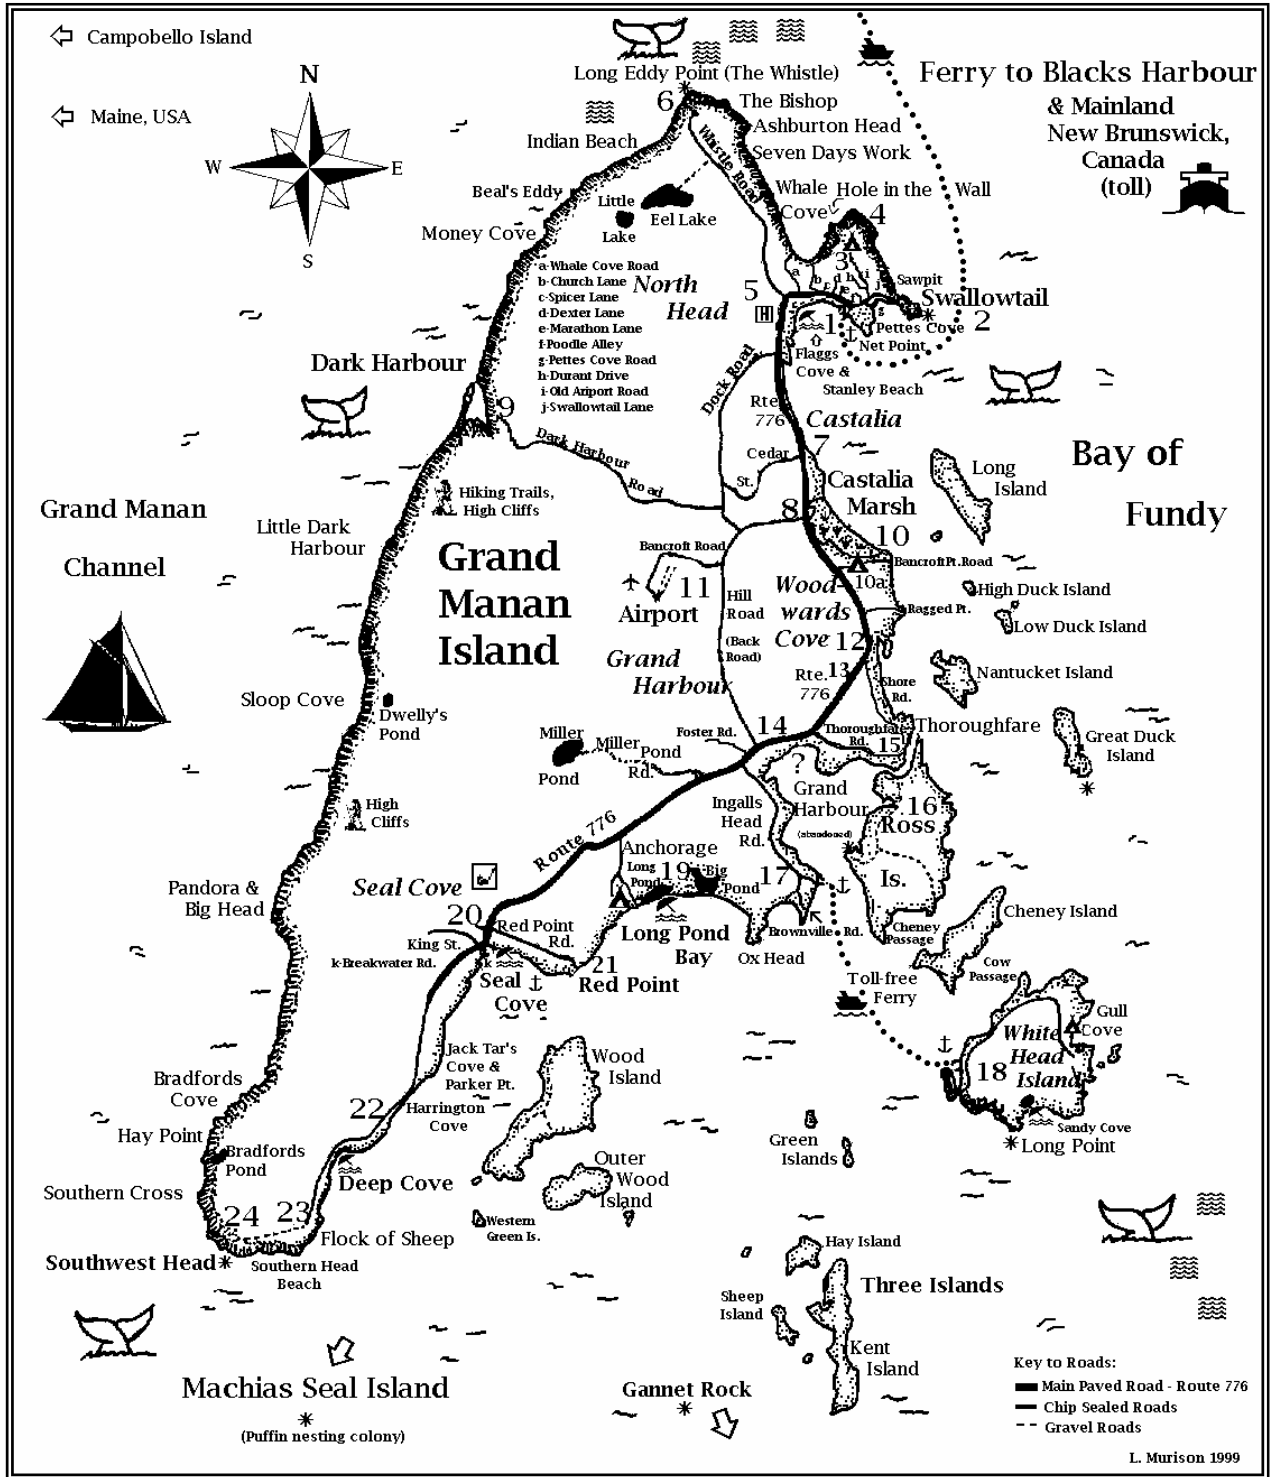

Key to Map Numbers:

1. GRAND MANAN FERRY WHARF
2. SWALLOWTAIL LIGHT – scenic lookout, sunrises
3. HOLE-IN-THE-WALL PARK/ WILDERNESS CAMPING
4. THE HOLE IN THE WALL – natural rock arch
5. NORTH HEAD AREA – Tennis courts, Alexandria Park (playground, ball diamond), Stanley's Beach, fishermen's wharf
6. THE WHISTLE – LONG EDDY POINT – lookout, sunsets
7. CASTALIA AREA – Ball diamond
8. PROVINCIAL BUILDING – NB Liquor, Government Services
9. DARK HARBOUR – centre of dulsing industry, high cliffs
10. CASTALIA MARSH – Prov. Picnic/rest area, bird watching
- 10A. CAMPGROUND/BANCROFT POINT ROAD
11. GRAND MANAN AIRPORT – 1000m (3,000') paved runway, VHF activated night lighting (Frequency 123.20)
12. WOODWARDS COVE AREA - fishermen's wharf
13. GRAND MANAN CURLING CLUB & SOLID WASTE TRANSFER STATION
14. GRAND HARBOUR AREA – Victoria Park (swimming pool, ball diamond, tennis courts, playground, picnic area)
15. THE THOROUGHFARE – Lobster pounds, access - Ross Is. low tide
16. ROSS ISLAND – site of settlement by United Empire Loyalists
17. INGALLS HEAD AREA - fishermen's wharf
18. WHITE HEAD ISLAND – sand beach, fishermen's wharf
19. THE ANCHORAGE – campsite, trailer service station, beach, migratory bird sanctuary, hiking trails
20. SEAL COVE AREA – Windsor Park (tennis courts, ball diamond, playground), Seal Cove Sand Beach, fishermen's wharf
21. RED POINT – site of geological contact. Best seen at low tide
22. DEEP COVE AREA
23. DEEP COVE SAND BEACH & FLOCK OF SHEEP
24. SOUTHWEST HEAD LIGHT – scenic lookout, cliffs, sunsets

Key to Symbols:

 Whale spots	Φ Tide Rip
 Hospital	Ψ Golf Course
Ξ Campground	Π Good Anchorage

Grand Manan Community Resource Plan

4.0 COMMUNITY'S ROLE

4.1 GENERAL

The community will identify local resources (see section 7 & 8) and sensitivity information (see section 9).

4.2 PLAN MAINTENANCE

The community will maintain and update the Community Emergency Response Resource Guidebook with the assistance of Coast Guard, various government agencies, and the Response Organizations.

4.3 INTERFACE

The community will work with the responding agencies to determine the definition of interface, roles and responsibilities.

5.0 LEVELS OF RESPONSIBILITIES

5.1 POLLUTER (RESPONSIBLE PARTY)

The polluter (responsible party) has the first responsibility for initiating effective action to counteract an environmental emergency. The polluter also has financial responsibility for damage and cleanup costs incurred as a result of the spill. The responsibility is subject to any liability arrangements or limitations provided by statute or court decisions, or by international conventions in force and ratified by Canada at the time of the incident. If the polluter chooses not to initiate cleanup actions or if the situation is of such magnitude that the polluter is unable to respond adequately, or if the polluter's response is inappropriate, ineffective or unsafe then Coast Guard will appoint an OSC and assume Command and Control of the spill.

5.2 DEPARTMENT OF FISHERIES & OCEANS

Canadian Coast Guard

The Canadian Coast Guard has the lead role in responding to those marine emergencies where:

1. Department of Fisheries & Oceans, by legislation, regulations, interagency agreement and precedent, has been authorized.
2. Assignment of authority has not been established but the Federal Government instructs the Department of Fisheries & Oceans, because of its authorities, marine expertise and resources, to lead the response.

The Canadian Coast Guard is responsible to investigate and act as lead agency for spills originating from vessels within "Waters of Canadian Interest", under its jurisdiction. In these cases, the CCG is responsible to ensure that the vessel owner complies with the Canada Shipping Act (CSA) and accepts responsibility for cleanup. The CCG will also investigate spills originating from drill rigs when the rigs are not in a drilling mode and has responsibilities with respect to mystery spills.

Department of Fisheries & Oceans

The Department of Fisheries & Oceans is responsible for managing and providing information and advice regarding fisheries resources and their habitats, as well as scientific advice in relation to fish.

5.3 ENVIRONMENT CANADA

Environment Canada, Environmental Protection Branch (EPB), leads the investigation of spills originating from federal facilities and federal vessels. EPB also has shared responsibilities with Fisheries and Oceans for spills impacting waters frequented by fish, under the Canadian Fisheries Act and the Canadian Environmental Protection Act.

EPB is responsible for ensuring that regional mechanisms are in place for timely and effective environmental emergency response efforts. To this end, the Regional Environmental Emergencies Team (REET) has been organized to provide consolidated, coordinated and comprehensive environmental information and advice concerning environmental impacts, resource sensitivities, environmental forecasting, contingency planning, cleanup techniques and priorities, and a host of other matters which arise while planning and responding to emergency events which affect or risk environmental quality.

While REET is chaired by Environment Canada, EPB, it includes a large number of federal and provincial agencies, which have expertise, information and responsibilities/authority relevant to environmental emergencies and environmental protection. Private industry and industry associations also participate in REET as they have significant interest in emergency response. Team members are normally drawn from the province or district in which the event occurs since these individuals would be expected to possess the necessary local knowledge and expertise, and would have access to and the ability to commit resources that may be necessary for the response.

Coastal communities will link into the REET process through the Regional Community Action Partnership Program (CAPP) Coordinator.

5.4 OFFICE OF CRITICAL INFRASTRUCTURE , PROTECTION & EMERGENCY PREPAREDNESS (OCIPEP)

This agency has the mandate to advance civil preparedness in Canada for emergencies of all types...by facilitating and coordinating among federal institutions and in cooperation with provincial governments, foreign governments and international organizations, the development and implementation of civil emergency plans.

5.5 NATURAL RESOURCES CANADA (NRCAN)

In the Maritime Region, EMR maintains the Atlantic Geoscience Centre to provide scientific advice in the area of coastal geomorphology, to determine the impact of cleanup methods on beaches and to conduct research aimed at better understanding beach processes throughout Atlantic Canada. Atlantic Geoscience Centre can also provide technical advice on chemical and toxic substances and their interaction with coastal and marine sediment, and shoreline video coverage.

5.6 CANADA-NOVA SCOTIA OFFSHORE PETROLEUM BOARD

Under the Canada-Nova Scotia Accord Implementation Act, CNSOPB is responsible for environmental as well as health and safety matters associated with oil and gas activity. CNSOPB is the lead agency for response to spills associated with exploration and production activity in their area.

5.7 CANADA PORTS CORPORATION

Marine emergency incidents are reported to Ports Canada authorities, who are designated lead agency for spills from vessels from within their area of jurisdiction (Halifax, Saint John, Belledune). Canada Ports Corporation and the Canadian Coast Guard have MOU's designating CCG as the lead resource agency to resource agency to respond to vessel spills in Canada Ports Corporation harbours.

5.8 TRANSPORT CANADA - TRANSPORT OF DANGEROUS GOODS

Transports of Dangerous Goods inspectors are responsible for the enforcement of the Transport of Dangerous Goods Regulations as they apply to land, water and air transport. TDG maintains a 24-hour national response centre called **CANUTEC**, and provides investigations during transport emergencies involving chemicals and other dangerous goods.

CANUTEC is the Canadian Transport Emergency Centre. It is located in Ottawa and is operated by the Transport Dangerous Goods Directorate of Transport Canada. **In an emergency, CANUTEC may be called collect at (613) 996-6666 (24 hours).**

CANUTEC provides a national bilingual advisory service and is staffed by professional chemists experienced and trained in interpreting technical information and providing emergency response advice. When an emergency call is received by **CANUTEC**, the Emergency Response Advisor obtains relevant information about the emergency and recommends appropriate response actions for the protection of the public and for the stabilization and containment of the dangerous goods involved.

5.9 PROVINCIAL DEPARTMENT OF ENVIRONMENT (NS, NB, PEI)

The Provincial Department of Environment acts as lead agency for spills that fall under provincial jurisdiction and are responsible for the designation of disposal sites and disposal procedures and, in addition, are a resource agency for human resources, surveillance, cleanup and environmental advice. They are normally responsible for providing provincial environmental advice and, where appropriate, soliciting input from other provincial government agencies such as fisheries, health, and mines and energy. The provincial environment departments investigate spills originating from land-based sources or sewers or spills affecting potable water supplies.

5.10 ROYAL CANADIAN MOUNTED POLICE (RCMP)

The RCMP responsibilities at the accident site are for traffic and crowd control, dealing with casualties, explosives disposal, bomb threats, evacuations and investigation of criminal matters. By virtue of being first on the scene, the RCMP may also be obliged to handle initial spill containment.

5.11 CANADIAN HERITAGE, PARKS CANADA

Parks Canada operates and maintains a significant number of national parks and heritage sites in the Atlantic Region. All the national parks have contingency plans to respond to environmental emergencies under their jurisdiction. Emergencies Section of EC liaises closely with Parks Canada staff during large incidents to share response resources and minimize the environmental impacts.

5.12 PROVINCIAL EMERGENCY MEASURES ORGANIZATIONS (NBEMO, NSEMO, PEIEMO)

Provincial Emergency Measures Organizations are lead agencies for incidents where public safety is the prime concern and can provide assistance to other lead agencies as required (e.g. evacuation, search and rescue, surveillance).

6.0 RESPONSE ORGANIZATION ROLE

6.1 GENERAL

The response organization has been created to ensure that a capability exists to deal with oil spills in the Canadian marine environment. Every bulk oil tanker over 150 gross tonnes, every dry cargo vessel over 400 gross tonnes, and all designated oil handling facilities (OHF's) are required by the Canada Shipping Act to have an arrangement with a certified response organization. All of the above are referred to as "clients" by the response organization.

The Response Organization may respond to a client's request for assistance in the event their property is involved in an oil spill. The response organization may provide operational management for the client who is the "responsible party" in the event of a spill.

Operational management includes:

- Logistics: The procurement of resources to support the operation
- Planning: The identification of sensitivities; shoreline impact assessment, prioritization of activities, waste disposal coordination, application of cleanup techniques, health and safety plan development, and documentation.
- Operations: The application of the procured resources, i.e. people and equipment to control, contain, and cleanup spilled oil.
- Finance: Payment of costs incurred by the Response Organization and invoicing for services rendered.

NOTE: These definitions are Response Organization doctrine.

The Response Organization is not responsible for the effects of an oil spill. This remains with the polluter. Command and control of all activities remain with the polluter. In the event the polluter does not accept this role, the Canadian Coast Guard assumes "command and control" of the incident and the Response Organization may be hired by the Canadian Coast Guard.

The Response Organization will also plan for the protection of identified sensitivities prior to oil spills occurring in its geographic area of response, and will work with communities to this end.

7.0 COMMUNICATION SYSTEMS

7.1 LANDLINE COMMUNICATION

- digital
- cellular (Roamer No. (506) 662-7626)

7.2 TWO-WAY RADIO COMMUNICATION

- VHF (situated on all fishing, many land vehicles and buildings such as houses, fish processing plants)
- CB sets (situated in many vehicles and buildings such as houses)
- Ham radio

7.3 DATA & FACSIMILE COMMUNICATION

- Data: NB Net, Sympatico, Community Access Centre located in High School in Grand Harbour (has public computer access and internet capability). The Business Centre in North Head also has a computer to can be accessed.
- Facsimile: available at Grand Manan Business Centre, most local businesses, Grand Manan High School, Village office, fishing and aquaculture associations.

7.4 INTERFACE TO OTHER SYSTEMS

Other communication systems -

- Cable 10 (community cable channel)
- CBC repeater Station 103.7 FM
- Newspapers (Telegraph Journal from Saint John - daily, St. Croix Courier from St. Stephen - bi-weekly, Quoddy Tides from Calais - bi-monthly, Island Times produced by the Grand Manan Business Centre- monthly)
- Talk Mail through NB Tel

8.0 Environmentally Significant Areas

Areas of environmental significance along the coast of Grand Manan are each diverse and unique in their recognized qualities.

This is a list of the Environmentally Significant Areas surrounding Grand Manan.

- 1) **Bulk Head Rip, Clarks Ground, Old Proprietor Ledge** - Important tidal convergence areas for feeding marine organisms year round - both summer and winter aggregations of seabirds
- 2) **Castalia Marsh** – Class 2 Tidal Marsh – Important roosting and feeding area for migrating birds.
- 3) **Dark Harbour Lagoon** – One of the most productive dulse sites; Night Heron, Thrush and Saw-whet Owl.
- 4) **Grand Harbour** – Many seabirds use this shallow harbour for feeding and roosting; Site of a rare plant as listed by Hinds (1983 & 1986).
- 5) **Grand Manan Basin** - Important feeding and nursery area for endangered right whales, summer aggregations of seabirds, blue fin tuna and other fish species. Central counterclockwise gyre in summer concentrates plankton.
- 6) **Grand Manan Island Archipelago** – Shallow water providing abundant feed for marine life which includes Right Whale and Humpback Whale, seabirds, fish.
- 7) **Great Duck, Low Duck, High Duck Islands** - Important nesting, roosting and feeding area for seabirds. Haulout sites for seals.
- 8) **Ingalls Head Bog** – This bog is one of only a few sites for a rare plant as listed by Hinds (1983 & 1986).
- 9) **Laborie Marsh** – The largest freshwater marsh/meadow on Grand Manan; Drinking water supply for much of the island.
- 10) **Long Eddy Tide Rip** - Important tidal convergence area for feeding marine organisms including mammals, birds, fish - year round.
- 11) **Long Island** – Used extensively by waterfowl for nesting, feeding, molting, and resting including Black-crowned Night Heron, bald eagle, common eiders, gulls. Haul out sites for seals.

- 12) **Machias Seal Island** – Bird Sanctuary – nesting area for Atlantic Puffin, Leach's Storm-Petrel, Razorbill, Arctic and Common Terns, some land birds.
- 13) **Migratory Bird Sanctuary (Great Pond)** – Several thousand waterfowl were once observed in this sanctuary. Site of rare plants as listed by Hinds (1983 & 1986).
- 14) **Nantucket Island** – Former concentrations of Black-crowned Night Herons.
- 15) **North Head** – Steep-cliffed headlands – rare plant species as listed by Hinds (1983 & 1986)
- 16) **Ox Head** – Site of rare plants as listed by Hinds (1983 & 1986)
- 17) **Red Point** – Basaltic Lava flows are in fault contact with Precambrian; The alders attract small land birds.
- 18) **Ross Island** – Site of several rare plants, as well as a few uncommon ones, as listed by Hinds (1983 & 1986).
- 19) **Southwest Head** – Near vertical rock cliffs composed of Triassic basalt; several arctic plants listed by Hinds (1983 & 1986).
- 20) **Three Islands (Kent, Sheep, Hay)** – Nesting colony of Leach's Storm Petrel. Bowdoin College, Bowdoin ME, has a field station on Kent Island.
- 21) **Yellow Murre Ledge** – Rocky Ledges that are the only known nesting site in NB of the Common Murre; Nesting site of the Razorbill. Important fishing grounds in surrounding area for lobster, scallops. Haul out sites for seals.
- 22) **The Wolves** - seabird nesting area.
- 23) **Wood Island and Outer Wood Island** – Site of Black-crowned Night Heron and Leach's Storm Petrel; Rare plant species as listed by Hinds (1983 & 1986).

17.1 VOLUNTEER MANAGEMENT CENTRES

Assignable Volunteer Positions: Rough estimates. Name of individuals in each position.

Requirements:

Registration Section:

Four (4) persons handling actual registrations.

One (1) person inside entrance to direct volunteers.

Position for interested but knowledgeable senior.

Health & Safety Training Section: Two (2) persons consisting of one (1) instructor and one (1) assistant instructor.

Task Assignment Section: Two (2) persons issuing task assignments.

Communication Section: Representatives from interested organizations (government, industry, CAPP).

First Aid Section: Two (2) minimum – one (1) nurse, one (1) EMT, or Ambulance attendant, RNA. This figure is a minimum estimate. Number of people would be relative to the size of spill.

Critical Incident Stress Management Section: Number of counselors as required

Critical Incident Stress Management Section: Number of counselors as required

VOLUNTEER RIGHTS AND RESPONSIBILITIES

All volunteers have the right to refuse an assignment. Every effort (within reason) should be made to place volunteers in acceptable assignments.

All volunteers are required to fulfill assignments to the best of their abilities.

A volunteer on his or her own initiative should undertake no additional responsibilities. Clearance from an area supervisor is always necessary.

In the event of a grievance or personality conflict, all attempts will be made to reach an acceptable conclusion. If not possible, the volunteer will be thanked for his/her efforts and relieved of his/her duties.

All volunteers are required to read and understand the MSD sheets that pertain to the incident. (MSD sheets to be provided by the Responsible Party or the Lead Agency).

Any and all accidents or reports of illness must be reported to your Area Supervisor immediately.

All volunteers should familiarize themselves with their assigned area. Satellite offices in each area should also be familiar to volunteers in case of emergency.

Grand Manan - Blacks Harbour Ferry Service

For July and August there are two ferries operating, MV "Grand Manan" which carries 100 passengers and 26 cars, and the MV "Grand Manan V" which carries 300 passengers and 65 cars. For the rest of the year only the Grand Manan V operates.

Return Rates: (Fares are collected for the round trip from the North Head, Grand Manan, ferry terminal). First come/ first served policy. Exception: Purchase of advanced tickets for the first trip leaving North Head on previous day between 0730-terminal closing. You must be in line at least 1/2 hour before the 0730 sailing. Advanced tickets for other trips during the day leaving North Head may be purchased that day but you must be in line 1 hour before departure.

<u>Passengers:</u>	<u>Cost:</u>	<u>Vehicles (excludes driver):</u>	<u>Cost:</u>

1930	2130	1930	2130

September 7 - October 15 with the exception of the transport of dangerous goods:

Grand Manan Mon-Fri	Blacks Harbour Mon-Fri	Grand Manan on Sat. & Sun.	Blacks Harbour on Sat. & Sun.
0730	0930	0730	0930
1130	1330	1130	1330
1530	1730	1530	1730
1930	2130		

Grand Manan Contingency Plan

Dangerous goods are transported the second Saturday and second Sunday of each month, during two round trip sailings, the first beginning from North Head following the last scheduled sailing, returning from Blacks Harbour at 2030 that evening and again at 0730 on Sunday from North Head. In July and August, dangerous goods are transported the second and fourth Saturday/Sunday both months leaving North Head at 1900, Blacks Harbour at 2130 on Saturday and 0730 on Sunday from North Head. Passenger numbers are restricted to 25 for these crossings only. Please check with Coastal Transport for any restriction, which may affect your travel plans for these days. Schedules are subject to change without notice.

White Head Ferry Service.

The MV "Lady White Head" can accommodate 45 passengers and 9 cars.

Summer Schedule: The crossing is 20 minutes and is **free of charge** from Grand Manan at Ingalls Head

Departs White Head		Departs Ingalls Head
